DEMOLLI

La nostra Azienda ha iniziato la sua attività nel 1965. Gli obiettivi erano quelli di creare articoli nuovi che semplificassero i piccoli problemi di ogni giorno in casa ed in cucina, di raggiungere direttamente o attraverso distributori la maggior parte dei punti di vendita al pubblico e di vendere solo prodotti che avrebbero garantito un'ottima qualità ed un prezzo equo.

Il nostro assortimento attuale si compone di circa 700 referenze, raggruppate in tre aree di business: articoli in legno per preparare e impastare; prodotti in materiale plastico per la cucina e la casa; soluzioni per il risparmio dell'acqua e per la protezione della tua cucina. I nostri clienti sono i migliori negozi di articoli casalinghi, da regalo, ferramenta e grande distribuzione.

Il 35% dei prodotti viene esportato in Europa, America del Nord, America Latina, Africa e Asia.

Quando nel 1975 l'architetto Marino Ferrari ha disegnato per noi i primi ganci autoadesivi Magic non si pensava neanche con l'ottimismo della gioventù che questi nuovi prodotti sarebbero diventati il simbolo di un oggetto: tutti abbiamo in casa almeno un gancio autoadesivo Magic - MastroGuido.

Un altro articolo che ha cambiato radicalmente le abitudini in cucina è il tagliere in polietilene. Siamo stati i primi all'inizio degli anni 80 a produrlo e a diffonderlo sul mercato italiano integrando l'antica abitudine di utilizzare il tagliere in legno. Questo prodotto è decisamente più igienico ed offre un supporto ideale ai coltelli, si può lavare e asciugare con estrema facilità. Oggi produciamo 18 modelli di taglieri in polietilene e in polipropilene, in oltre 15 varianti di colore.

La nostra Azienda è sempre stata attenta al rispetto dell'ambiente: i prodotti in legno e le confezioni sono in linea con le esigenze imposte dall'ecologia.

Per il futuro siamo impegnati nella ricerca di nuovi articoli che continuino la tradizione ormai più che cinquantennale della nostra Azienda con l'entusiasmo di sempre.

Our Company began its activity in 1965. Its aim was to create new articles which could simplify and solve everyday's problems in the house and the kitchen. Its goal was to reach the majority of retailers, directly or through distributors, and to only sell those products which could guarantee optimum quality at a fair price.

Our current assortment consists of around 700 references, grouped into three business areas: wooden items for preparing and kneading; plastic products for kitchen and home; solutions for saving water and protecting your kitchen.

Our customers are the best household goods, gift, hardware and large-scale retailers. 35% of the products are exported to Europe, North America, Latin America, Africa and Asia.

When architect Marino Ferrari, in 1975, designed for us the first self-adhesive hook Magic, we could never imagine, despite our youthful optimism, that these products would have become a symbol: everyone has at home at least one of these Magic-MastroGuido hooks. Another article that radically changed people's habits in the kitchen is our polyethylene cutting board. We were the first ones to produce it in the '80s and to spread it on the Italian market, replacing the old habit of using wooden cutting boards. This product is much more hygienic, while also offering an ideal support for knives and it can be washed and dried with extreme ease. Today we produce 18 models of polyethylene and polypropylene cutting boards, in 15 different shades and colours.

Our Company has always been respectful of the environment: our wooden products and our packaging are in line with the demands imposed by ecological concerns.

For the future, we are committed to research and design new articles which can continue the more than 50-year-old tradition of our Company, and with our usual enthusiasm.

Taglieri

Polietilene

Il polietilene è il più semplice dei polimeri sintetici, viene indicato con la sigla "PE" ed è la materia plastica più diffusa nel mondo. Per le sue caratteristiche chimico/fisiche ed essendo completamente atossico e inodore, il polietilene è ideale per realizzare taglieri e piani di lavoro per alimenti.

Proprietà fisiche: ha densità da 0,91 a 0,93 g/cm³ e può sopportare temperature fino a 65 °C continuamente. I taglieri realizzati in polietilene possono essere lavati in lavastoviglie.

Atossicità: il polietilene è un materiale completamente atossico. L'eccellente inerzia chimica e la totale atossicità rendono il polietilene un materiale ideale per il contatto con gli alimenti. La natura di questa resina termoplastica non favorisce la crescita di alghe, batteri o funghi.

Resistenza chimica ed alla corrosione: il polietilene è chimicamente inerte alle temperature normali di utilizzo, ha una buona resistenza ad un'ampia gamma di sostanze chimiche; per tale motivo non si fessura e non si corrode. Ha un'eccellente resistenza alla corrosione.

Flessibilità: l'elevata flessibilità del polietilene e la sua capacità di riprendere la forma originaria in seguito a deformazione lo rendono idoneo ad assorbire vibrazioni, urti e sollecitazioni durante l'uso dei prodotti realizzati.

È riciclabile al 100%: il polietilene è un materiale riciclabile ed è usato normalmente per produrre sacchetti e contenitori vari. Il riciclaggio permette di recuperare le materie prime di cui sono composti i prodotti e reimmetterle nei processi di produzione come input di produzione. Il riciclaggio riduce lo sfruttamento delle risorse naturali consentendo un minore impatto ambientale della produzione.

Basse temperature: le proprietà meccaniche del polietilene consentono alle condotte di poter operare anche a temperature molto basse nell'ordine di -60°C. Mantiene un'eccellente tenacità anche a basse temperature.

Polyethylene

This material is the simplest among synthetic polymers. Identified by the suffix "PE", is the most common plastic used for products. Ideal for making chopping boards and work surfaces for handling food, due to its inherent chemical/physical characteristics, being non-toxic and odourless.

Physical properties: polyethylene has a density range between 0,91 and 0,93 g/cm³ and can resist prolonged exposures to temperatures of up to 65 °C. Chopping boards can easily be washed in dish washers.

Non-toxic: polyethylene is completely non-toxic. The excellent chemical inertia and its characteristics make it an ideal material for handling food. This thermoplastic resin nature does not promote bacteria, fungi and algae.

Chemical resistance to corrosion: this material is completely inert at normal room temperature, it has a good resistance to a wide range of chemical substances, so it does not crack, nor does it corrode. PE also shows an excellent resistance to corrosion.

Flexibility: polyethylene's high flexibility and its plastic characteristic to return to its original shape after being deformed, makes it ideal for absorbing vibrations and mechanical stresses during use of products produced using this material.

100% Recyclable: polyethylene is recyclable and normally used to make plastic bags and containers. Recycling allows to re-use material already used and reintroduce it into the production cycle. This best practice helps reduce natural prime material needs and environmental impact.

Low temperatures: inherent mechanical characteristics allow this material to operate as ducts also at very low temperatures of up to -60°C. Tenacity is also maintained at low temperatures.

TAGLIERI ANTIBATTERICI

Il materiale utilizzato contiene uno specifico agente antibatterico efficace per tutta la durata del tagliere

Il materiale di questo tagliere contiene un agente antibatterico che previene la crescita dell'e.coli, stafilococco, salmonella ed altri batteri e funghi. L'agente antibatterico è efficace per l'intera durata del tagliere ed ha tutti i requisiti richiesti dalla Food & Drug Administration. Si raccomanda l'uso della lavastoviglie e delle comuni norme di igiene domestica. Lavare prima dell'uso.

ANTIBACTERIAL CUTTING BOARDS

Special material containing an antibacterial agent

Cutting board in a special material, containing an antibacterial agent, which prevents the growing of e.coli, staphylococcus, salmonella and other kinds of bacteria. The antibacterial agent is effective for the whole cutting board life and it follows the Food & Drug Administration's rules. It's suggested the use of the dishwasher and to follow the basic laws of domestic hygiene. Wash before use.
