	Nidi e mangiatoie 226 <i>Bird nests</i>

DEMOLLI®

La nostra azienda ha iniziato la sua attività nel 1965. Gli obiettivi erano quelli di creare articoli nuovi che semplificassero i piccoli problemi di ogni giorno in casa ed in cucina, di raggiungere direttamente o attraverso distributori la maggior parte dei punti di vendita al pubblico e di vendere solo prodotti che avrebbero garantito un'ottima qualità ed un prezzo equo.

Il nostro assortimento attuale è composto dai 700 articoli illustrati in questo catalogo; i clienti sono i negozi di articoli casalinghi, da regalo, ferramenta e grande distribuzione.

Il 35% dei prodotti viene esportato nei paesi della CEE, negli Stati Uniti, in Brasile, in Cina ed in Giappone.

Quando nel 1975 l'architetto Marino Ferrari ha disegnato per noi i primi ganci autoadesivi Magic non si pensava neanche con l'ottimismo della gioventù che questi nuovi prodotti sarebbero diventati il simbolo di un oggetto: tutti abbiamo in casa almeno un gancio autoadesivo Magic - MastroGuido.

Un altro articolo che ha cambiato radicalmente le abitudini in cucina è il tagliere in polietilene. Siamo stati i primi all'inizio degli anni 80 a produrlo e a diffonderlo sul mercato italiano sostituendo l'antica abitudine di utilizzare il tagliere in legno. Questo prodotto è decisamente più igienico ed offre un supporto ideale ai coltelli, si può lavare e asciugare con estrema facilità. Oggi produciamo 18 modelli di taglieri in polietilene e in polipropilene, in oltre 15 varianti di colore.

La nostra azienda è sempre stata attenta al rispetto dell'ambiente: i prodotti in legno sono realizzati con materiali certificati FSC® e le nostre confezioni sono in linea con le esigenze imposte dall'ecologia. Stiamo realizzando un impianto fotovoltaico che ci consentirà di produrre tutta l'energia elettrica necessaria ai nostri laboratori e le nostre vetture per i trasporti leggeri ed il merchandising sono a metano.

Per il futuro siamo impegnati nella ricerca di nuovi articoli che continuino la tradizione ormai quasi cinquantennale della nostra azienda con l'entusiasmo di sempre.

Our company began its activity in 1965. Its aim was to create new articles which could simplify and solve everyday's problems in the house and the kitchen. Its goal was to reach the majority of retailers, directly or through distributors, and to only sell those products which could guarantee optimum quality at a fair price.

At present, our product range is made up of 700 articles, illustrated in this catalogue. Our clients are retailers which sell household items, hardware shops, gift-shops, kitchenware shops and wholesalers.

35% of our products is exported to EU countries, the USA, Brazil, China and Japan.

When architect Marino Ferrari, in 1975, designed for us the first self-adhesive hook Magic, we could never imagine, despite our youthful optimism, that these products would have become a symbol: everyone has at home at least one of these Magic-MastroGuido hooks.

Another article that radically changed people's habits in the kitchen is our polyethylene cutting board. We were the first ones to produce it in the '80s and to spread it on the Italian market, replacing the old habit of using wooden cutting boards. This product is much more hygienic, while also offering an ideal support for knives and it can be washed and dried with extreme ease. Today we produce 18 models of polyethylene and polypropylene cutting boards, in 15 different shades and colours.

Our company has always been respectful of the environment: our wooden products are made with certified FSC® material and our packaging is in line with the demands imposed by ecological concerns.

We are now building a sun-powered plant which will allow us to produce all of the electrical energy needed by our laboratories. The cars we use for our light transports and merchandising are fuelled by methane.

For the future, we are committed to research and design new articles which can continue the almost 50-year-old tradition of our company, and with our usual enthusiasm.

Cutting boards

TAGLIERI

Polietilene

Il polietilene è il più semplice dei polimeri sintetici, viene indicato con la sigla "PE" ed è la materia plastica più diffusa nel mondo. Per le sue caratteristiche chimico/fisiche ed essendo completamente atossico e inodore, il polietilene è ideale per realizzare taglieri e piani di lavoro per alimenti.

Proprietà fisiche: ha densità da 0,91 a 0,93 g/cm³ e può sopportare temperature fino a 65 °C continuamente. I taglieri realizzati in polietilene possono essere lavati in lavastoviglie.

Atossicità: il polietilene è un materiale completamente atossico. L'eccellente inerzia chimica e la totale atossicità rendono il polietilene un materiale ideale per il contatto con gli alimenti. La natura di questa resina termoplastica non favorisce la crescita di alghe, batteri o funghi.

Resistenza chimica ed alla corrosione: il polietilene è chimicamente inerte alle temperature normali di utilizzo, ha una buona resistenza ad un'ampia gamma di sostanze chimiche; per tale motivo non si fessura e non si corrode. Ha un'eccellente resistenza alla corrosione.

Flessibilità: l'elevata flessibilità del polietilene e la sua capacità di riprendere la forma originaria in seguito a deformazione lo rendono idoneo ad assorbire vibrazioni, urti e sollecitazioni durante l'uso dei prodotti realizzati.

E' riciclabile al 100%: il polietilene è un materiale riciclabile ed è usato normalmente per produrre sacchetti e contenitori vari. Il riciclaggio permette di recuperare le materie prime di cui sono composti i prodotti e reimmetterle nei processi di produzione come input di produzione. Il riciclaggio riduce lo sfruttamento delle risorse naturali consentendo un minore impatto ambientale della produzione.

Basse temperature: le proprietà meccaniche del polietilene consentono alle condotte di poter operare anche a temperature molto basse nell'ordine di -60°C. Mantiene un'eccellente tenacità anche a basse temperature.

Polyethylene

This material is the simplest among synthetic polymers. Identified by the suffix "PE", is the most common plastic used for products. Ideal for making chopping boards and work surfaces for handling food, due to its inherent chemical/physical characteristics, being non-toxic and odourless.

Physical properties: polyethylene has a density range between 0,91 and 0,93 g/cm³ and can resist prolonged exposures to temperatures of up to 65 °C. Chopping boards can easily be washed in dish washers.

Non-toxic: polyethylene is completely non-toxic. The excellent chemical inertia and its characteristics make it an ideal material for handling food. This thermoplastic resin nature does not promote bacteria, fungi and algae.

Chemical resistance to corrosion: this material is completely inert at normal room temperature, it has a good resistance to a wide range of chemical substances, so it does not crack, nor does it corrode. PE also shows an excellent resistance to corrosion.

Flexibility: polyethylene's high flexibility and its plastic characteristic to return to its original shape after being deformed, makes it ideal for absorbing vibrations and mechanical stresses during use of products produced using this material.

100% Recyclable: polyethylene is recyclable and normally used to make plastic bags and containers. Recycling allows to re-use material already used and reintroduce it into the production cycle. This best practice helps reduce natural prime material needs and environmental impact.

Low temperatures: inherent mechanical characteristics allow this material to operate as ducts also at very low temperatures of up to -60°C. Tenacity is also maintained at low temperatures.

Taglieri antibatterici

Il materiale utilizzato contiene uno specifico agente antibatterico efficace per tutta la durata del tagliere

Il materiale di questo tagliere contiene un agente antibatterico che previene la crescita dell'e.coli, stafilococco, salmonella ed altri batteri e funghi. L'agente antibatterico è efficace per l'intera durata del tagliere ed ha tutti i requisiti richiesti dalla Food & Drug Administration. Si raccomanda l'uso della lavastoviglie e delle comuni norme di igiene domestica. Lavare prima dell'uso.

Antibacterial cutting boards

Special material containing an antibacterial agent

Cutting board in a special material, containing an antibacterial agent, which prevents the growing of e.coli, staphylococcus, salmonella and other kinds of bacteria. The antibacterial agent is effective for the whole cutting board life and it follows the Food & Drug Administration's rules. It's suggested the use of the dishwasher and to follow the basic laws of domestic hygiene. Wash before use.

Il marchio FSC®

Legno da foreste correttamente gestite

Gli articoli contrassegnati con questo marchio sono realizzati in legname certificato FSC COC. Il marchio FSC® identifica i prodotti contenenti legno proveniente da foreste gestite in maniera corretta e responsabile secondo rigorosi standard ambientali, sociali ed economici.

La foresta di origine è stata controllata e valutata in maniera indipendente in conformità a questi standard (principi e criteri di buona gestione forestale), stabiliti ed approvati dal Forest Stewardship Council®.

Il marchio FSC®

Wood from forest managed in a correct and responsible way

These items are made from certificated FSC COC wood. The FSC® mark identifies all products containing wood, which comes from forests managed in a correct and responsible way, according to rigorous environmental, social and economic standards.

The origin forest is checked and valued in an independent way in compliance with these standards (principles and criteria of forest management), set and approved by Forest Stewardship Council®.

IDROGAS
rompigetto e
accessori lavello

Certificazioni A.C.S. (Attestazione Conformità Sanitaria) ★

IDROGAS è in grado di offrire una ulteriore testimonianza a garanzia della qualità dei propri progetti. Nonostante l'appartenenza alla Comunità Europea, anche in ambito di normative sanitarie, molti paesi appartenenti prevedono regolamenti nazionali prevalenti rispetto a quelli continentali.

IDROGAS, in quanto produttore di rompigetto, per esportare i propri prodotti in Francia, ha sottoposto un'ampia selezione dei propri rompigetto alle severe verifiche previste dall'ordinanza 29/06/1997 modificata e circolare Ministero della Salute Francese DGS/SD7A nr.571 25/11/2002 ottenendo, per tutti gli articoli proposti, l'Attestazione di Conformità Sanitaria (A.C.S.) indispensabile ed obbligatoria dal 01/01/2007 per la commercializzazione in Francia di prodotti a contatto con acqua destinata a consumo umano.

Verifica documentale sulle composizioni delle materia prime utilizzate e test sui prodotti sono stati eseguiti presso CARSO L.S.E.H.L. (Laboratoire Santé Environnement Hygiène de Lyon), uno dei quattro laboratori accreditati dal Ministero della Salute Francese per il rilascio di questa attestazione.

A.C.S. (Health Conformity Certification) ★

IDROGAS can further warranty quality of its own design. Many countries have to abide to local stringent legislation regarding health and safety norms. These can be even more severe than the ECU laws they already make part of.

IDROGAS produces jet-breakers, and in order to export its products has to conform to very severe verification with respect to the 29/06/1997 modified Ordinance and French circular Ministry of Health DGS/SD7A nr.571 25/11/2002. IDROGAS has obtained for all products the certification of health conformity (A.C.S.), essential and mandatory since 01/01/2007 to be able to sell products in contact with water for human use in France.

Document verification on material composition and tests have been carried out at CARSO L.S.E.H.L. (Laboratoire Santé Environnement Hygiène de Lyon), one of four laboratories accredited by the French Ministry of Health to certify these type of products.

IDROGAS, qualità e innovazione dal 1940

Una lunga esperienza, garanzia di qualità del prodotto ed affidabilità del servizio.

Creatività, competenza tecnica ed intuizione: caratteristiche maturate e cresciute nel corso di questa lunga storia imprenditoriale che hanno permesso ad IDROGAS di attraversare questi anni da protagonista del settore degli accessori lavello. L'ampia gamma di prodotti IDROGAS sviluppata per rendere pratico, igienico e confortevole l'utilizzo del lavello nasce da una progettazione sensibile alle esigenze del mercato, attenta alle problematiche dell'ambiente e nel rispetto delle normative in continua evoluzione. La componentistica è interamente prodotta in Italia con attrezzature di nostra proprietà e l'assemblaggio realizzato dal nostro personale, altamente qualificato da anni di esperienza e formazione, presso il reparto di produzione e confezionamento, dove il binomio qualità e convenienza è realizzato anche grazie ad un importante livello di automazione dei processi.

Nel 2008 Idrogas entra a far parte del gruppo di prodotti Demolli® Srl, azienda leader del mercato per la produzione di articoli casalinghi ed accessori per la tavola in plastica ed in legno.

Qualità, normativa, certificazioni e ambiente:

IDROGAS, da sempre attenta al rispetto di severi parametri qualitativi e dei requisiti normativi previsti dal campo di applicazione dei propri prodotti, garantisce l'utilizzo di materiali conformi alle normative vigenti ed idonei per l'utilizzo per il quale i propri prodotti sono destinati.

IDROGAS sottopone periodicamente una selezione dei propri rompigetto a test presso laboratori indipendenti per verificarne l'idoneità al contatto con acqua destinata ad uso umano secondo il regolamento previsto dal decreto 6 aprile 2004 n.174.

IDROGAS, quality and innovation since 1940

A long course experience to guarantee quality of products and reliability of services.

Creativity, technical competence and intuition: characteristics which have grown and evolved during the long intrapreneural activity of IDROGAS. During these years, the company has played as one of the leaders in the production of accessories for sinks and wash basins. The vast spectrum of available IDROGAS products has developed in order to make the use of wash basins practical, hygienic and comfortable. The product offer originated from a close design kept close to the market needs, weary of ambient restrictions, and respectful of ever changing norms.

Components are entirely produced in Italy with self owned machinery, and assembly done by our highly qualified workers, with years of experience and training. Components are produced in the production and packaging section, where quality and convenience is achieved using a distinct level of process automation. During 2008 IDROGAS has been absorbed by Demolli® Srl group of products, a leading company in the production of household products and dining table accessories in plastic and wood.

Quality, Legislation, certification and environment:

IDROGAS has always been keen to meet quality goals and legislative certification for all its products. The company can easily guarantee prime materials used for its items, and certify they are in line with severe quality standards requested for the specific applications they are destined for.

According to actual regulations, namely n. 174 dated April 6th 2004, IDROGAS undergoes regular periodic tests on its jet-breakers to confirm the corresponding suitability with water intended for human use.

Ambiente e risparmio

incremento demografico ed utilizzo sempre meno responsabile delle risorse, in assenza di politiche internazionali idonee, porteranno nel prossimo futuro il nostro pianeta verso un'inevitabile emergenza idrica con risvolti particolarmente drammatici in alcune parti del mondo. Per questo diventa necessario ripensare all'acqua non più come risorsa infinita, bensì esauribile e preziosa. Ridurre lo spreco dell'acqua vuol dire abbassare i costi economici ed ambientali, non solo dell'acqua, ma anche dell'energia e delle emissioni collegate (trasporto e riscaldamento)

IDROGAS, da sempre sensibile alle problematiche legate all'ambiente, con i suoi rompigetto aerati propone una semplice soluzione per contribuire alla riduzione del consumo di acqua senza modificare le proprie abitudini. Questo dispositivo, miscelando acqua e aria, aumenta il volume dell'acqua fuoriuscita dal rubinetto generando un getto morbido, con un maggiore potere lavante. Quindi, a parità di effetto, minore acqua consumata. Inoltre tutti i rompigetto IDROGAS possono essere dotati di economizzatore, un dispositivo che limitando il passaggio di acqua, riduce ulteriormente il consumo di acqua senza modificare il comfort dell'utilizzatore.

Environment and savings

The demographic increase and the ever increasing waste of resources, without an adequate international policy, will inevitably drag us into a water shortage emergency, with particular dramatic scenarios in some parts of the world. It must therefore be mandatory to think of water not as an endless resource, but yet as a precious and potentially ending prime wealth. Reducing waste of water means reducing costs and environmental impact, not only of water itself but also energy and emissions associated with transport and heating.

The company has always been very sensitive to the preservation of our environment, and with its air jet-breakers it offers a solution which definitely contributes to water saving without any significant change to personal habits. The jet-breaker mixes air and water increasing the volume of water coming out of the tap, with the result of a comfortable soft jet with increased cleaning potential. IDROGAS Jet-breakers means keeping the same washing effect, with less waste of water. Furthermore, all IDROGAS jet-breakers can be combined with an economizer which further reduces the use of water, though keeping the same comfort and effect for the end user.

Aeratori Idrogas

Gli aeratori Idrogas sono prodotti ad alto contenuto tecnologico e progettati in modo da prevenire la formazione del calcare. La particolare conformazione del circuito di passaggio dell'acqua attraverso un insieme di retine e riduttori limita la portata dell'acqua ad un massimo di 8 lt/minuto, contro i 15 potenzialmente erogati da un rubinetto privo di limitatore di portata, senza modificare il comfort dell'utilizzatore. Il nuovo aeratore Idrogas è realizzato interamente in acetica, una particolarissima resina che, per le sue caratteristiche di assoluta impermeabilità, è in grado di ritardare notevolmente la formazione di calcare rispetto ai normali aeratori con retina metallica. Non solo: la particolare forma della retina posteriore, che ha una superficie superiore del 30% rispetto alla retina dei normali aeratori, consente di ridurre la formazione di depositi anche nel condotto di ingresso dell'acqua. Mantenere efficiente l'aeratore è ancora più semplice grazie all'innovativa chiave di servizio che, oltre ad agevolare montaggio e smontaggio del dispositivo, la chiave, realizzata in tecnopolimero ha una estremità realizzata in modo da essere inserita nelle feritoie di aerazione e di passaggio dell'acqua e frammentare i residui con una lieve pressione e rotazione senza la necessità di smontare l'aeratore e di utilizzare prodotti chimici aggressivi per il contenitore cromato.

IDROGAS aerators

These are high technology products, specifically designed to prevent limestone deposits. The water passage has been closely designed to go through a network of fine matrices and passages to limit the flow to 8 ltr/min, compared to a normal 15ltr/min flow in a common household tap, without any modification for the user comfort.

The new IDROGAS aerator is made of Acetal, a particular resin which, due to its chemical structure, can significantly slow down the limestone build up compared with a metallic net. Furthermore, the particular design of the rear matrix, which displays an extra 30% area with respect to a metallic traditional one, and is also capable of reducing deposit build-up in the inlet part of the tap.

Efficient maintenance of the aerators is even easier, with an innovative technopolimer tool, which makes disassembly and reassembly easy and quick. The tool has a special fork which can be inserted into the Aerosol slots and water passages, then with a slight pressure and rotation of the tool, it can fragment lime build up without having to disengage the aerosol. There is no need to use aggressive chemical liquids to remove build up like with chrome containers.

NIDI E MANGIATOIE

Bat Box

Un rifugio sicuro per i nostri amici pipistrelli

I pipistrelli si rifugiano nelle grotte, nelle fessure dei muri, nelle cavità dei tronchi degli alberi, nei sottotetti delle case e nei ruderi, che sono sempre meno disponibili. La Bat Box offre un rifugio comodo, sicuro, che può essere facilmente controllato e protetto.

La Bat Box è "sicura" poiché i predatori come le donnole, i barbagianni, i gufi, i gatti e le martore non vi possono entrare.

La diffusione delle Bat Box potrà validamente proteggere i nostri amici dal rischio di estinzione.

I pipistrelli svolgono una preziosa azione contro gli insetti dannosi o molesti. In una notte un esemplare riesce a mangiare una quantità di insetti pari al 50% del suo peso, che corrisponde a circa 2.000 zanzare.

Bat Box

A safe refuge for our bat-friends

Bats take refuge in caves, wall cracks, hollows of tree trunks, the attics of houses and ruins, which are becoming less common. The Bat Box offers a comfortable, safe refuge, that can easily be controlled and protected.

The Bat Box is "safe" because predators like weasels, owls, such as screech owls, cats and martens can't get in.

The spread of Bat Box will be able to help our "friends" from the risk of extinction.

Batsake action against damaging or annoying insects. In one night only bat can eat a quantity of insects equal to 50% of its weight, which corresponds to about 2000 mosquitoes.
